

Wayne Funnell

Experience

Wayne's skills and capabilities have been gained over 25 years in the field and include successful consultancies to major commercial, government and defence organisations in Australia and overseas. Since concentrating on a career in management consultancy he has achieved an impressive record in management of large IT & Construction projects through strategy, conceptual and detailed designs, costing and budget development, contract negotiation, tendering, investment analysis, and delivery to demanding time and cost constraints.

Wayne understands and can communicate with business as well as technology professionals and senior management bringing their efforts to bear in a cooperative manner to achieve superior results. Perhaps most importantly, Wayne has the ability to think laterally and to add significant value to both his clients and his employing organisation.
